Cristian Bazatin

Front-End / Full-Stack Web Developer

Agno, Ticino, Switzerland • Swiss L Permit • +41 76 213 27 63 • cristianbazatin7@gmail.com

PROFILE

Web developer with 3+ years of experience building responsive websites, online shops and web applications. Works mainly with JavaScript, TypeScript, Svelte and React on the front end, and Node.js and SQL on the back end. Holds a Master's degree in Cyber Security and Machine Learning.

SKILLS

Front-End: JavaScript, TypeScript, HTML, CSS, Svelte / SvelteKit, React, Next.js, Tailwind CSS
Back-End: Node.js, Express, Python (FastAPI), C#, REST APIs
Databases: PostgreSQL, MongoDB, SQL, Prisma
Tools: Git, Docker, CI/CD, Vite, WordPress, Agile / Scrum
Security: Secure login (JWT), user roles and permissions, input validation
AI: AI-assisted development (LLMs), Machine Learning basics

WORK EXPERIENCE

Delivery Driver | Divoora, Lugano, Switzerland — 08/2026 – Present

- Pick up orders from restaurants in the Lugano area and deliver them to customers by car.
- Handle orders through the Divoora app: accepting jobs, navigation and delivery confirmation.
- Plan routes to meet delivery time windows.
- Check orders are complete and communicate directly with customers and restaurants.

Full Stack Web Developer | Allpart, Remote — 08/2023 – 10/2025

- Built an online shop with SvelteKit and TypeScript: product catalog, search, cart and checkout.
- Connected the site to product, order and payment services through REST APIs.
- Added secure login and user roles (JWT, sessions, role-based access).
- Made pages load faster with code splitting and lazy loading.

Junior Web Developer | RealData, Romania — 09/2022 – 07/2024

- Maintained and improved a public web portal for taxes and fees.
- Designed responsive, accessible layouts that work across browsers and devices.
- Found and fixed front-end and back-end bugs; used C# and SQL for data processing.

Web Developer Intern | Softbinator, Constanta, Romania — 06/2022 – 09/2022

- Built a shared wishlist platform with user accounts, groups, invitations and notifications.
- Created REST APIs and login / permission features.

PROJECTS

DRTRUCK – Company Password & Media Vault — 2026
Web app built for the company DRTRUCK to store and manage all company passwords in one place, with support for any other records, including photos and videos.

Web Application Security – Master's Project — 2025
Secure web app where each user only sees the data allowed by their clearance level, with an admin panel and activity log. *React, Node.js, Express, JWT*

Car Specification Translation Tool — 2025
Tool that uses an AI language model to translate car specifications from Polish to English and standardise units and terms. *Python, LLM*

AdrianaBrows – Beauty Salon Website — 2024
Responsive website with online booking and automatic email confirmations. *Svelte, Rust, SQL, MailJet*

Melilux – Furniture Online Shop — 2022
Responsive e-commerce website with custom layouts and product galleries. *WordPress, Elementor*

EDUCATION

Master in Cyber Security and Machine Learning | Ovidius University of Constanta, Romania — 2023 – 2025
Bachelor's Degree in Computer Science | Ovidius University of Constanta, Romania — 2020 – 2023
